

Common ports and usages (useful to memorize for interviews/exams):

- **Port 80:**
This is the default port for **HTTP** (Hypertext Transfer Protocol) traffic. It is used for web browsing and accessing websites.
- **Port 443:**
This is the default port for **HTTPS** (Hypertext Transfer Protocol Secure) traffic. It is used for secure web browsing and transmitting data over encrypted connections.
- **Port 21:**
This is the default port for **FTP** (File Transfer Protocol) traffic. It is used for uploading and downloading files between a client and a server.
- **Port 22:**
This is the default port for **SSH** (Secure Shell) traffic. It is used for secure remote login and command execution on a remote server.
- **Port 25:**
This is the default port for **SMTP** (Simple Mail Transfer Protocol) traffic. It is used for sending emails.
- **Port 53:**
This is the default port for **DNS** (Domain Name System) traffic. It is used for translating domain names into IP addresses.
- **Port 110:**
This is the default port for **POP3** (Post Office Protocol version 3) traffic. It is used for retrieving emails from a mail server.
- **Port 143:**
This is the default port for **IMAP** (Internet Message Access Protocol) traffic. It is used for accessing and managing emails on a remote mail server.
